Work Experience

Junior iOS Developer, Station, San Diego: September 2015 - March 2016

- Worked with project managers, iOS, Web, Android, API, Design, and QA teams to develop Station using good software design practices.
- Responsible for assisting with integration of key features involving REST, CocoaPod frameworks, UIKit, content creation, core data, GCD, and social media integration, in addition to handling itunesconnect and developer.apple accounts. Codebase was in Obj-C.

iOS Developer, Superior Real Estate Solutions: December 2014 - October 2015

- Responsible for all design, development, & distribution tasks of Comp Photos, a real estate app for Superior Real Estate Solutions.
- Handled all engineering duties and project management responsibilities. Maintained Parse backend. Codebase was in Swift

Front End Web Developer, myHandyTech, Sacramento: February 2014 - September 2014

- Responsible for all front end web development responsibilities (HTML5, CSS3, JS) and some back-end (PHP) development.
- Frequently used Photoshop & Illustrator to create edit and create images for client websites.
